

Cal St Francis

Candidate for Ordination, United Church of Canada · Halifax, Nova Scotia
calstfrancis.github.io · github.com/calstfrancis · calstfrancis@disroot.org

I build **contemplative software**: specialized tools for ministers, worship leaders, and academics, and narrative games rooted in liturgy, memory, and theology in the traditions of liberation and process. Everything is free, MIT-licensed, and distributed as Flatpaks from a self-hosted repository. No accounts, no cloud, no telemetry — every application writes plain files to your own disk, and syncs only to servers you already control.

LITURGICAL & ACADEMIC TOOLS

Зеркало / Zerkalo “mirror”

TYPST IDE · RUST, GTK4

Full academic Typst workplace. Templates for SBL, Chicago, APA, IEEE and Gost, live preview, document management, versioned backup through your own git remote, spellcheck, and export to PDF, DOCX and HTML.

Rubric “the red instruction”

LITURGY PLANNER · PYTHON, GTK4

Plans worship from first reading to finished bulletin for United Church congregations. RCL lectionary, hymn lookup and scripture fetching feed a print-ready bulletin typeset with a bundled Typst engine.

Искра / Iskra “spark”

SERMON PLANNER · RUST, GTK4

Preaching from structured notes rather than a full manuscript: single-line ideas that expand, group into movements, and reorder by hand. Scripture references autocomplete and build a bibliography; a chrome-free Preaching View is built for the pulpit.

ГОСТ / Gost “the standard”

ESSAY TEMPLATER · PYTHON, GTK4

Turns a manuscript into a ready-to-compile academic template in LaTeX, Typst, or Word — citation style, book layout and front matter handled, so writing starts immediately.

Скрижаль / Skrizhal “tablet of the law”

CV DATABASE · RUST, GTK4

YAML editor for CV elements, each keyed like a citation. A shared GTK-free core crate lets Zerkalo’s CV mode read entries straight out of it.

EVERYDAY TOOLS

Копилка / Kopilka “money box”

COUPLES BUDGET · PYTHON + KOTLIN

Budget planner for two people — spending, income, debts and savings goals together. Data stays local or syncs through your own WebDAV server. An Android companion in Jetpack Compose shares the same files.

Мера / Mera “measure, moderation”

FIREFOX EXTENSION

One discipline: hold you to the number of tabs you decided was enough. Pinned tabs are never counted. The rule is yours; Mera simply keeps it.

INTERACTIVE FICTION

Соборность / Sobornost “unity in freedom”

NARRATIVE ENGINE · PLAIN JS

Browser-native engine for contemplative, state-reactive interactive fiction. No build step, no dependencies. Soundings, theosis, charisms, branching dialogue, rituals.

The Severed Hours

TEXT ADVENTURE · BROWSER

Noir interactive fiction set inside the offices of Drenthe & Associates, a firm whose promises of Continuity, Clarity and Compliance mask something far stranger.

Спасибо / Spasibo “thank you”

THEOTIC MYSTERY · BROWSER

A contemplative mystery aboard a research schooner on a winter North Atlantic crossing. Theosis, soundings, cover, and the slow disclosure of memory.

Install everything at once

`flatpak remote-add --if-not-exists calstfrancis`

`https://calstfrancis.github.io/flatpak/calstfrancis.flatpakrepo`

Typeset with Typst — the same engine bundled inside Rubric, Zerkalo, and Gost. Freely given, freely received.
